## Carbon calculator

*Cliquez sur l'image*

This tool, developed by the GoodPlanet Foundation and accessible to everyone with no registration, will be of great help to you.

It allows you to evaluate a company's greenhouse gas emissions (useful in the case of an internship for example, or for your future job), your individual carbon footprint, or that of trip you wish to go on. Lastly, it allows you to calculate the emissions related to an event. So, if you are looking to organize a party or any other event for your student association, this tool can be very useful.
